

The MILESTONE Vista

"Resilience - Respect - Responsibility"

SCHOOL EDITION

VOLUME V

2022-23

From the Principal's Desk

Today, the role of a school is not only to pursue academic excellence but also to motivate and empower its students to be lifelong learners, critical thinkers, and productive members of an ever-changing global society.

The child's learning involves and revolves around an effective partnership between home & school. Students need to be provided with a platform to think, express, and exhibit their skills. At Milestone we aim at making our students ready for the new and ever changing world.

As we complete this session post pandemic I would like to express my gratitude to my teachers and parents for working together to bridge the learning gaps caused by the pandemic. This renewed partnership will help achieve our common goal.

Wishing you All the Best for the session 2023-24.

Career Guidance

TMSS News: 15 Oct 2022

A Career Counselling Session was organized for the students wherein the Resource person Lt Colonel Vishwaroop serving as a dentist in the Army Medical Corps addressed the students with an informative presentation. The session was aimed at spreading awareness amongst the students about the various opportunities available in the army.

Mobile Addiction in Students' Life

"HOME is where heart is , but today , the PHONE is where the heart is."

Now a days the mobile phone has become the central part of human beings life. Every human being these days is pinned towards his cell phone. This has adverse effects on future generation. Mobile addiction is a real quandary and a matter of concern. Mainly, teenagers are being highly attracted towards mobile phone and are distracted from their studies. They spend a lot of time on social media and waste their precious time. Due to mobile phones their life is becoming sedentary. Sedentary lifestyle cause many health issues. The students are even unable to concentrate on their studies for a long time. It also affects their thinking abilities and memory. It reduces cognitive and learning skills.

Finally, I realised that people are prisoners of their phones, that's why it is called cell phone.

To conclude, students must spend very less time on mobile phones and try to do physical activities and they should solve puzzles or mind games. This will increase their thinking power and will make their brains healthy.

Grade VIII

Success is No---Accident

There is no success, no movement forward, no progress, no growth, and no development if you don't try. So it is popularly said, "Try again and again until you succeed." But the question is how should you try. Here are a few ways in which you can and should try.

First of all, you should try again and again with enthusiasm. As Ralph Waldo Emerson said, "Nothing great was ever achieved without enthusiasm." Don't let anything discourage you. Interestingly, the word "enthusiasm" comes from the Greek words "en" and "theos"; and it means "in God." So when you are full of enthusiasm it will be like you are energized with the joy of God.

Secondly, you should try again and again with persistence. It simply means to keep on doing and keep on moving. Many give up after they try a few times. A last final try is built upon many earlier attempts; and all of them go into the making of success. As Former U.S. President Calvin Coolidge said: "Nothing in this world can take the place of persistence." He added that talent nor genius nor education can take the place of persistence. So persist.

Finally, you should try again and again with hope. There is much in this world that can cause despair. But as R. L. Stevenson said, "To travel hopefully is a better thing than to arrive." You should never give up hope. You should hope for a better tomorrow, always. You should hope that there will be light at the end of the tunnel. You should hope that love and truth will win over hate and lies. You should hope that your attempts will end in success. So journey in hope. To conclude, think of what Nick Vujicic said:

"I am gonna try again and again, because the moment I give up, is the moment I fail."

Therefore try again and again with enthusiasm, persistence, and hope. Victory is near!

Namanpreet
Grade VIII

Girl child the chosen one!

The hand that rocks the cradle
The mother of tomorrow- a girl
Who shifts the destiny of Civilization
But the magic is gone, the daya woman is born...
The woman who bore her for months always prays for the sons.
Her load is too heavy as her mother considered her a levy.
Blessings of elders are only for the male
See what is a fate of a female!
She says to everyone I want to live - I want to live!
I have so much of love to give.
But why is she hated by the society
She is also created by Almighty...!
I want to ask people today
Why do they love to have a boy?
As need of wealth they worship Lakshmi.
In need of education they worship Saraswati.
In need of courage they invoke Durga Devi.
Remember girls are future of every nation
They are God's beautiful creation!
Please don't put a girl child down
She is the future and God's beautiful creation!!!

Parents' Orientation

Parents' orientation program was organized by the institution wherein the Pan India team of Educational experts apprised the parents about the new curriculum and their role in young ones learning and educational journey. It was an informative and an interactive session which provided a platform to the parents to engage with experts from the field of education and child development and be oriented towards ways in which they can guide their young learners during their formative years.

Teachers' Augmentation

The school provides a perfect platform to the teachers to enhance their professional skills and improve their pedagogical knowledge according to NEP - 2020 which aims at the competency driven curriculum.

Our Young Geniuses

Our students brought laurels to the institution by bagging Gold Medal in English and Maths Olympiad
